PROFESSIONAL SUMMARY

Proficient AI Engineer with a demonstrated history of leading corporate AI advancements through the development of agentic systems and high-impact GenAI solutions. Expert in Python with a focus on **Agentic AI orchestration, RAG pipelines, and distributed ML systems** to drive enterprise growth and operational efficiency. Proven track record in delivering mission-critical applications across multiple domains such as **Revenue Cycle Management, Tax Compliance, and Clinical Analytics**, leveraging cutting-edge LLM governance and deep learning to transform complex data into actionable business intelligence.

Total Experience: 3.5 years

EDUCATION

University of Southern California, USA

Aug 2021 - May 2023

Masters of Computer Science (AI Specialization): **GPA: 3.61/4.0**

Savitribai Phule Pune University, India

Aug 2016 - Jul 2020

Bachelor of Engineering, Computer Engineering: **CGPA: 9.19/10**

SKILLS

Core Skills: Agentic AI, GenAI, Cloud Computing, ML engineering, Data engineering

AI & Machine Learning: TensorFlow, PyTorch, Numpy, Pandas, Scikit-Learn

Cloud & Web Technologies: Google Cloud Platform, Microsoft Azure, AWS, Docker, Kubernetes, NextJS, Streamlit

Data Science: SQL/NoSQL Databases, Vector Databases, Snowflake, Databricks, PowerBI, Tableau

WORK EXPERIENCE

Deloitte Touche Tohmatsu India LLP

Assistant Manager – AI Developer

May 2024 – Present

Abbott R1 RCM – AI Insights Platform (Revy)

- **Engineered an Agentic BI Chatbot** using Snowflake Cortex and LLM orchestration to automate query filtering and chart generation for a suite of enterprise dashboards.
- **Drove self-serve insight generation for 3,000+ users**, receiving formal appreciation from senior leadership for significantly accelerating executive decision-making.
- **Skillset Demonstrated:** Mastered **Agentic AI orchestration**, Snowflake Cortex configuration, and prompt engineering for enterprise-grade response governance.

Tax Incentive Opportunity Identification

- **Built a RAG-based pipeline** using LangChain and Azure AI Search to automate US IRS tax credit evidence extraction from unstructured reports.
- **Reduced tax analysis turnaround time from days to minutes** by implementing reasoning-based extraction prompts and scalable OCR data pipelines.
- **Skillset Demonstrated:** Expertise in **Retrieval-Augmented Generation (RAG)**, Vector Databases, and building audit-ready AI systems for high-compliance domains.

Abbott Medical AI Model Development POD

- **Fine-tuned CNN architectures** and designed preprocessing workflows in Databricks, deploying production-ready models via Azure ML Studio for medical use cases.
- **Mastered Deep Learning (CNNs) and MLOps** by delivering a scalable GitHub repository that optimized model performance and ensured long-term inference sustainability.

VDart Incorporated

Business AI Analyst

Sept 2023 – May 2024

- **Optimized business-critical processes** using attention-based ML models, contributing to a **20% faster processing time**.
- **Improved actionable insights** by applying Explainable AI (XAI) techniques to standardize and streamline enterprise event workflows.

Sagveek Technologies Ltd.

Machine Learning Intern

Mar 2020 – Oct 2020

- **Designed automated information extraction systems** to mine valuable insights from large-scale databases using regression and clustering algorithms.
- **Collaborated on end-to-end data preparation**, implementing feature scaling and data imputation to ensure high-quality training sets for model evaluation.

CERTIFICATES

- Generative AI Fundamentals (Google Cloud and Databricks)
- TensorFlow in Practice Specialization (Coursera)
- Cloud Digital Leader (Google Cloud)
- Deep Learning (IBM), Data Science (IBM)
